

Emergency Planning for the **Limerick Area**

Important Safety Information For Your Community and Annual Needs Survey 2024/2025

Please read the entire brochure or have someone translate it for you. Discuss this information with members of your family, and then keep the brochure in a convenient place for future use.

ESTA INFORMACIÓN ES IMPORTANTE

Por favor lea este panfleto o busque a alguien que se lo lea. Comparta esta información con su familia y mantenga este panfleto en un lugar conveniente para un uso futuro. Si necesita obtener copia de este panfleto en español, por favor llame al Centro Hispano Daniel Torres, al 610-685-1260.

What to Do in an Emergency

Monitor and Prepare

Tune your radio or TV to one of the stations listed in this brochure. Monitor the radio or TV for emergency information and follow emergency instructions. People should prepare for possible evacuation (e.g. reunite with family members, assemble emergency kits, provide for pet needs, keep off of the road as much as possible).

Keep Phone Lines Open

Please do not make unnecessary phone calls. Leaving phone lines open for emergency workers will help everyone involved. If you require assistance, call the emergency phone numbers broadcast on the radio or TV.

Shelter-in-Place

Go indoors and stay there. Close all doors and windows and shut off any systems that draw in outside air, such as furnaces, fireplaces and air conditioners. Keep listening to the radio or TV for updates. Keep pets inside and shelter farm animals. If traveling in a vehicle, close windows and vents.

If Instructed to Evacuate

In an evacuation, people in the affected area will be asked to go to local reception centers listed within this brochure. After this, they can stay at specified mass care centers or with friends or relatives outside the evacuation zone.

Please do not try to pick up children or others at schools, hospitals, nursing homes or overnight campgrounds. These facilities will be following their own emergency plans, and you would most likely miss connections. If evacuated, students, hospital patients and nursing home residents will be accompanied to relocation centers where their needs will be addressed. To find out where people are being moved, stay tuned to the radio or TV.

Plan for three days away from home, locking up and turning appliances off as you would for a weekend vacation. Pack all necessary items (see "Emergency Supplies"). Evacuate everyone in your home, following directions given on the radio or TV. These routes will have been selected as the safest ways out of the affected area.

NOTE: If time permits and if safe to do so, the public is encouraged to alert neighbors, by means other than the telephone, to ensure they heard and understand the warning signals and have transportation to reception centers.

Shadow Evacuation

People should only evacuate when instructed to do so. Evacuation of individuals not within the declared evacuation area could impede evacuation traffic flow. Monitor the radio or TV and prepare to follow instructions.

Staged Evacuation

You may be instructed to shelter-in-place until people in a higher risk area are evacuated. Monitor the radio or TV and prepare to follow instructions.

Information for Farmers

When advised to do so, remove all livestock from pasture, shelter if possible and provide them with stored feed and protected water. The county U.S. Department of Agriculture representative will provide further instructions regarding the protection of livestock and foodstuffs.

School Information

If your child's school is in session at the time evacuation is recommended, children attending schools located within the emergency planning zone will be transported to designated host schools outside the area. They will remain under supervision until reunited with parents or guardians. These host schools have been planned to coincide with main evacuation routes. Children whose

homes are inside the emergency planning zone, but who attend school outside the emergency planning zone, will not be sent home if an evacuation is recommended. They will follow the specific plans designated in the district's emergency procedures. See the "County-specific School Information" within this brochure or contact school officials for more information.

Non-Public School and Day Care Information

Parents and guardians with children attending non-public schools or at day care facilities within the emergency planning zone should become familiar with the facilities emergency plans. Contact the facility operator for more information.

How to Prepare for an Emergency

You never know when you might have to leave your home on short notice. A nuclear incident is only one possibility. Floods, fires, chemical spills or severe illness could occur at any time. Preparing now will help you respond more quickly in any emergency.

Emergency Kit

Keep an emergency kit – portable radio, flashlight, extra batteries, extra car keys, first aid kit and other items – in a special place that the whole family can easily locate. Include this booklet in your emergency kit with your location marked on the map. Write a list of the items you would want to take if you had to leave home quickly and post the list in a convenient spot. Be sure to keep a supply of all the items on your list. Gather any important documents that you might need in an emergency and keep them together in a safe place that you can access quickly and easily.

Transportation

Maintain your vehicle in good running order or go to the closest event bus pickup point (noted later in this brochure) to your location to get to the identified reception center. **If you will need transportation in an emergency, use the attached reply card to notify local authorities now.**

Pets

Service animals will be permitted inside reception centers or shelters.

Pet sheltering information will be available at the reception centers and shelters for your area.

Contact your respective County Emergency Management Agency for additional information.

Emergency Supplies

- General first aid kit and any special medication
- Cash, credit, or ATM cards
- Important documents
- Change of clothing
- Personal health products (toothbrush, eye care, sanitary products, etc.)
- Baby formula, diapers, car seat, toys
- Special dietary foods
- Pet related supplies

Nuclear Power and Public Safety

Benefits and Potential Risks of Nuclear Power

Used properly, nuclear fission (the “splitting” of uranium atoms) is a safe, dependable source of electricity. It is reasonable, though, to be concerned about what might happen in the event of a serious incident at a power plant.

A power plant reactor cannot produce a nuclear explosion. The uranium fuel contains very little fissionable material. The complex structure of a nuclear power plant is designed to prevent the release of radiation. A serious incident, however, could allow some radiation to escape and be carried away from the plant by the wind. The degree of risk to the public would depend on the size of the plume, the direction and speed of the wind, and other factors.

Emergency Planning for the Limerick Area

Special plans have already been developed to protect the public in the event of a nuclear incident in your area. These plans give specific attention to people who – like you – live, work or visit within 10 miles of a nuclear power plant. Procedures are in place to help protect you and other members of the public in the unlikely event of a nuclear emergency. If necessary, area officials would declare an emergency and take measures to ensure public safety.

This informational packet addresses procedures for the Limerick area. Please read and save this material for future reference.

Although it specifically addresses a potential nuclear accident, much of the information is useful in any major emergency.

Warning Sirens

If you hear a siren, you should tune to one of the Emergency Alert System (EAS) stations listed in this brochure for official information.

The sirens are full volume tested semi-annually in June and December. A monthly test is also conducted which operates the sirens for less than one minute.

A siren may malfunction and inadvertently sound. If you feel a siren is malfunctioning, please contact your county emergency management officials at the numbers below:

Berks County (610) 655-4921
Montgomery County (610) 631-6530
Chester County (610) 344-5000

Public Inquiry Telephone Numbers

Berks County (610) 320-6150
Montgomery County (610) 631-3000
Chester County (610) 344-6480

Shelter-in-Place or Evacuation

Officials might recommend that people either take shelter indoors or evacuate an area. It is critically important that you follow the recommended course of action. Staying home when instructed to evacuate or driving around when urged to stay indoors could expose you to danger unnecessarily.

NOTE: If you or someone you know might not respond to warning sirens or tv or radio broadcasts due to impaired hearing or other factors, please contact your County Emergency Management Agencies to register.

Potassium Iodide (KI)

Potassium Iodide (KI) is a nonprescription drug that may prevent the thyroid from absorbing radioactive iodine. KI is one type of protective action that may be recommended during a nuclear incident. KI should only be taken at the direction of the appropriate state and local authorities. Consult your physician if you have concerns about the safety of KI for your child or yourself. KI is effective in blocking the absorption of radioactive iodine only. Since it does not block the absorption of any other radioactive material, evacuation or sheltering in place may be the most effective and preferred protective actions. Residents living within the 10-mile radius, who have not already done so, may obtain more information about KI or obtain KI by contacting:

**Pennsylvania Department of Health at 1-877-PA-HEALTH or
www.health.pa.gov**

Classification of Accidents

There are four accident classifications used to describe nuclear emergencies. We contact federal, state and local authorities in each of the following situations:

UNUSUAL EVENT — A situation is in progress or already completed which could potentially degrade the plant's level of safety or indicate a security threat to the facility. No releases of radioactive material requiring offsite actions are expected unless safety systems degrade further.

ALERT — Events are in progress or have occurred which have (or could) substantially degrade the plant safety; or, a security event that could threaten site personnel or damage to site equipment is in progress. Any offsite releases of radioactive material that could occur are expected to be minimal and far below limits established by the Environmental Protection Agency's (EPA) protective action guides (PAGs).

SITE AREA EMERGENCY — Events are in progress or have occurred which have caused (or likely will cause) major failures of plant functions that protect the public, or involve security events with intentional damage or malicious acts that could lead to the likely failure of (or prevent effective access to) equipment needed to protect the public. Any offsite releases of radioactive material are expected to remain below EPA PAG exposure levels beyond the site boundary.

GENERAL EMERGENCY — Events are in progress or have occurred which: a) have caused (or shortly) will cause substantial reactor core damage, with the potential for uncontrolled releases of radioactive material; or, b) involve security events that deny plant staff physical control of the facility. Offsite releases can be reasonably expected to exceed EPA PAG exposure levels beyond the plant site.

What You Need to Know About Nuclear Power Plants and Radiation

How Do Nuclear Plants Work?

Power plants create electricity by running steam turbines, which are powered either by fossil fuels – coal, oil, natural gas – or by nuclear power. Nuclear technology produces energy by splitting uranium atoms in a process called fission. **(A)** Fission generates heat that **(B)** boils water for the steam that runs the **(C)** turbines, which produce the **(D)** electricity that we all use – making, for instance, **(E)** toast for breakfast.

In a nuclear power plant, pea-sized uranium pellets are stacked inside long, thin fuel rods, which are grouped in “assemblies” inside a reactor “core.” The core is encased in a very thick steel capsule, and the entire reactor is further protected by an airtight steel and concrete building called a “containment.” This complex structure is designed to help ensure the safe utilization of nuclear power.

How Do We All Benefit From Nuclear Power?

Any fuel used to produce energy also produces waste. By-products of coal-burning include smoke, ashes and slag. Even with the latest technologies, it is impossible to prevent some of this waste from reaching the environment outside the power plant. Nuclear power generation, on the other hand, produces waste primarily in the form of spent fuel, which is not released into the environment. Besides helping to protect

the environment, nuclear energy is also highly efficient, producing vastly more energy for its weight than coal or oil. We would have to burn more than 120 gallons of oil or up to a ton of coal to produce the same amount of energy as that found in a single pellet of uranium.

What Is Radiation?

Radiation is energy in the form of rays or particles. Some atoms – the ones we call radioactive – are unstable. As they go through a natural process called “decay” in which they change into a stable atom, they throw off rays or particles called radiation. Radiation is exactly the same, whether from nature, or medical or industrial activities.

Radiation is measured in millirems. On average, a person receives about 300 millirem of radiation annually from natural sources and another 300 millirem or so from X-rays and other medical procedures. It takes more than 35 times this much – over 20,000 millirem in a single day – to produce identifiable effects in the body. Federal regulations allow workers to receive up to 5,000 millirem of radiation in the course of a year’s work.

www.emergency.cdc.gov/radiation

Evacuation Routes

Know your location on the map and mark it. Some primary evacuation routes are listed below. In an emergency, follow the directions given on the radio or TV, even if different from those shown below. Broadcasted directions will be based on actual road and weather conditions and wind direction – helping to ensure your safety as you leave the evacuation area. Report to the identified reception center. If you need a temporary place to stay, the center will provide directions to a mass care center nearby. For those who require transportation assistance, call the transportation assistance numbers listed below for your area.

Evacuation Routes/Reception Centers/ Transportation Assistance Numbers

Berks County

Amity Township (Amity Gardens)

Evacuation Route: Take Route 422 West to the reception center.

Reception Center: Exeter Township Building, East of Reading.

Transportation Assistance Number:
(610) 689-6000

Amity Township (East)

Evacuation Route: Take Route 662 North to Route 73 East to reception center.

Reception Center: Oley Township Reception Center

Transportation Assistance Number:
(610) 689-6000

Boyertown Borough

Evacuation Route: Take Route 73 West to reception center.

Reception Center: Oley Township Reception Center

Transportation Assistance Number:
(610) 369-3028

Colebrookdale Township (West of Route 100)

Evacuation Route: Take Route 73 West to the reception center.

Reception Center: Oley Township Reception Center

Transportation Assistance Number:
(610) 369-3028

Colebrookdale Township (East of Route 100)

Evacuation Route: Take Route 100 North to Route 29 North to the reception center.

Reception Center: Emmaus High School, Emmaus.

Transportation Assistance Number:
(610) 369-3028

Douglass Township (South)

Evacuation Route: Take Route 662 North to Route 73 East to the reception center.

Reception Center: Oley Township Reception Center

Transportation Assistance Number:
(610) 367-8500

Douglass Township (North)

Evacuation Route: Take Route 562 West to Route 662 North to Route 73 East to the reception center.

Reception Center: Oley Township Reception Center

Transportation Assistance Number:
(610) 367-8500

Earl Township

Evacuation Route: Take Route 562 West to 662 North to Route 73 East to the reception center.

Reception Center: Oley Township Reception Center

Transportation Assistance Number:
(610) 367-8920

Union Township

Evacuation Route: Take Route 724 West to the reception center.

Reception Center: Robeson Township Building.

Transportation Assistance Numbers:
(610) 385-3769 or (610) 582-3769

Washington Township

Evacuation Route: Take Route 100 North to Route 29 North to the reception center.

Reception Center: Emmaus High School, Emmaus.

Transportation Assistance Number:
(610) 845-7760

Attention Chester & Montgomery County Residents

Residents of Chester and Montgomery Counties should sign up to receive official alerts and notifications at:

ReadyChesCo:

www.readychesco.org

ReadyMontCo:

<https://readymontco.org/>

This system provides direct and immediate information during an emergency and allows you to provide detailed and confidential information useful to your local emergency management agency. If you do not have access to a computer, a friend or family member can complete the online registration for you.

An instructional video is available at:
