

# Appendix C

## Air Quality Conformity Documentation and Resolution

Air Quality Conformity .....261

Air Quality Resolution for the Reading MPO.....265

## Air Quality Conformity

The Clean Air Act Amendments of 1990 (CAAA) mandate improvements in the nation's air quality. The CAAA directs the U.S. Environmental Protection Agency (EPA) to implement regulations that will provide for reductions in pollutant emissions. The Berks County area was originally designated under the CAAA as a moderate non-attainment area for ground level ozone. Ozone is a secondary pollutant, which means that it is not emitted directly into the atmosphere but, rather, is created by the reaction of several pollutants in the presence of sunlight. Oxides of Nitrogen (NO<sub>x</sub>) and Volatile Organic Compounds (VOC) are the two precursor pollutants that take part in that reaction. Ground level ozone is an eye and lung irritant that has been shown to cause difficulties in the elderly, very young, and those with weakened respiratory systems.

### **1997 and 2008 8-hour Ozone NAAQS**

The EPA published the 1997 8-hour ozone NAAQS on July 18, 1997, (62 FR 38856), with an effective date of September 16, 1997. An area was in nonattainment of the 1997 8-hour ozone NAAQS if the 3-year average of the individual fourth highest air quality monitor readings, averaged over 8 hours throughout the day, exceeded the NAAQS of 0.08 parts per million (ppm). On May 21, 2013, the EPA published a rule revoking the 1997 8-hour ozone NAAQS, for the purposes of transportation conformity, effective one year after the effective date of the 2008 8-hour ozone NAAQS area designations (77 FR 30160). As of July 20, 2013, Berks County no longer needs to demonstrate conformity to the 1997 8-hour ozone NAAQS. However, future SIP revisions must address EPA's anti-backsliding requirements.

The EPA published the 2008 8-hour ozone NAAQS on March 27, 2008, (73 FR 16436), with an effective date of May 27, 2008. EPA revised the ozone NAAQS by strengthening the standard to 0.075 ppm. Thus, an area is in nonattainment of the 2008 8-hour ozone NAAQS if the 3-year average of the individual fourth highest air quality monitor readings, averaged over 8 hours throughout the day, exceeds the NAAQS of 0.075 ppm. Berks County was designated as a marginal nonattainment area under the 2008 8-hour ozone NAAQS, effective July 20, 2012 (77 FR 30088).

### **2015 8-hour Ozone NAAQS**

In October 2015, based on its review of the air quality criteria for ozone and related photochemical oxidants, the EPA revised the primary and secondary NAAQS for ozone to provide requisite protection of public health and welfare, respectively (80 FR 65292). The EPA revised the levels of both standards to 0.070 ppm, and retained their indicators, forms (fourth-highest daily maximum, averaged across three consecutive years) and averaging times (eight hours). Under the Clean Air Act, the EPA administrator is required to make all attainment designations within two years after a final rule revising the NAAQS is published. However, the deadline for EPA to issue designations for the 2015 NAAQS for ozone passed on October 1, 2017. Once designations are final, transportation conformity would be required within 12 months for any areas designated nonattainment under the standard.

### **1997 Annual PM<sub>2.5</sub> and 2006 24-hour PM<sub>2.5</sub> Standards**

The EPA published the 1997 annual PM<sub>2.5</sub> NAAQS on July 18, 1997, (62 FR 38652), with an effective date of September 16, 1997. An area is in nonattainment of this standard if the 3 year average of the annual mean PM<sub>2.5</sub> concentrations (for designated monitoring sites within an area) exceed 15.0 micrograms per cubic meter (µg/m<sup>3</sup>). Berks County was designated as a nonattainment area under the 1997 annual PM<sub>2.5</sub> NAAQS, effective April 5, 2005 (70 FR 944).

The EPA published the 2006 24-hour PM<sub>2.5</sub> NAAQS on October 17, 2006, (71 FR 61144), with an

effective date of December 18, 2006. The rulemaking strengthened the 1997 24-hour standard of  $65 \mu\text{g}/\text{m}^3$  (62 FR 38652) to  $35 \mu\text{g}/\text{m}^3$  and retained the 1997 annual  $\text{PM}_{2.5}$  NAAQS of  $15 \mu\text{g}/\text{m}^3$ . An area is in nonattainment of the 2006 24-hour  $\text{PM}_{2.5}$  NAAQS if the 98<sup>th</sup> percentile of the annual 24-hour concentrations, averaged over three years, is greater than  $35 \mu\text{g}/\text{m}^3$ . Berks County was designated as attainment under the 2006 24-hour  $\text{PM}_{2.5}$  NAAQS, effective December 14, 2009 (74 FR 58688). A redesignation request and maintenance plan applicable to the 1997 annual  $\text{PM}_{2.5}$  NAAQS was approved by EPA and effective December 22, 2014 (79 FR 76251). The maintenance plan includes 2017 and 2025  $\text{PM}_{2.5}$  and  $\text{NO}_x$  mobile vehicle emission budgets (MVEBs) for transportation conformity purposes. Since the last conformity determination was completed, EPA took final action on the “*Fine Particulate Matter National Ambient Air Quality Standards: State Implementation Plan Requirements*” rule on August 24, 2016 (81 FR 58010 effective on October 24, 2016). In that rulemaking, EPA finalized the option that revokes the 1997 primary annual  $\text{PM}_{2.5}$  NAAQS in areas that have always been designated as attainment and in maintenance of that NAAQS. After revocation, areas no longer must expend resources on CAA air quality planning and conformity determination requirements associated with the 1997 annual  $\text{PM}_{2.5}$  NAAQS.

### **2012 Annual $\text{PM}_{2.5}$ Standard and Subsequent Actions**

The EPA published the 2012 annual  $\text{PM}_{2.5}$  NAAQS on January 15, 2013, (78 FR 3086), with an effective date of March 18, 2013. The EPA revised the annual  $\text{PM}_{2.5}$  NAAQS by strengthening the standard from  $15 \mu\text{g}/\text{m}^3$  to  $12 \mu\text{g}/\text{m}^3$ . An area is in nonattainment of this standard if the 3 year average of the annual mean  $\text{PM}_{2.5}$  concentrations for designated monitoring sites in an area is greater than  $12.0 \mu\text{g}/\text{m}^3$ . On December 18, 2014, EPA issued final designations for the standard that were revised on April 7, 2015 (80 FR 18535). Berks County is designated in attainment of the standard and, as such, no longer must perform emission testing for fine particulates.

On February 7, 2024, the U.S. Environmental Protection Agency (EPA) announced a final rule to revise once again the annual  $\text{PM}_{2.5}$  NAAQS by strengthening the standard from  $12 \mu\text{g}/\text{m}^3$  to  $9 \mu\text{g}/\text{m}^3$ . Based on current monitoring data Berks County still meets this more stringent standard and will not be required to perform emission analysis for this pollutant.

### **Conformity Analysis Results**

Transportation conformity analyses of the TIP and LRTP has been completed for Berks County. The analyses were performed according to the requirements of the Federal transportation conformity rule at 40 CFR Part 93, Subpart A. The analyses utilized the methodologies, assumptions and data as presented in previous sections. Interagency consultation has been used to determine applicable emission models, analysis years and emission tests.

### **Emission Tests**

There are currently no approved SIP MVEBs for Berks County under 2008 8-hour ozone NAAQS. However, the County has an approved SIP revision establishing MVEBs under the 1997 8-hour ozone NAAQS. The MVEBs were originally approved on January 14, 2008 (73 FR 2162) and subsequently revised on March 31, 2014 (79 FR 17875). As required, the latest revised budgets are used for the ozone conformity test. The ozone conformity analysis has been conducted to evaluate emissions in comparison to the applicable ozone MVEBs summarized in **Exhibit 8**.

**Exhibit 8: 8-Hour Ozone Motor Vehicle Emission budgets**

County / Pollutant	2009 Budget (tons/day)	2018 Budget (tons/day)
VOC	13.1	7.5
NO <sub>x</sub>	29.0	14.9

**Analysis Years**

Section 93.119(g) of the Federal Transportation Conformity Regulations requires that emissions analyses be conducted for specific analysis years as follows:

- A near-term year, one to five years in the future.
- The MPO’s horizon year for long range planning.
- All established MVEB years.
- Attainment year of the standard if within timeframe of the conformity analysis.
- An intermediate year or years such that if there are two years in which analysis is performed, the two analysis years are no more than ten years apart.

All analysis years were determined through the interagency consultation process. **Exhibit 9** provides the analysis years used for this conformity analysis.

**Exhibit 9: Transportation Conformity Analysis Years**

Analysis Year	Description
2025	Interim Year
2035	Interim Year
2045	L RTP Horizon Year

**Regionally Significant Highway Projects**

For the purposes of conformity analysis, model highway networks are created for each analysis year. Regionally significant projects from the TIP were coded onto the networks. Detailed assessments were only performed for those new projects which may have a significant effect on emissions in accordance with 40 CFR Parts 51 and 93. Only those projects which would increase capacity or significantly impact vehicular speeds were considered. Projects such as bridge replacements and roadway restoration projects, which constitute the majority of the TIP, have been excluded from consideration since they are considered exempt under 40 CFR 93.126-127. A list of highway projects is shown in **Attachment A**.

**Analysis Results**

An emissions analysis has been completed for the 2008 8-hour ozone NAAQS. **Exhibit 10** summarizes the Berks County ozone emission results for a summer weekday in each analysis year. All years are lower than the applicable conformity budgets established in the regional maintenance plan for the 1997 ozone NAAQS. A detailed emission summary is also provided in **Attachment B**. Example MOVES importer (XML) and run specification (MRS) files are provided in **Attachment C**.

**Exhibit 10: Ozone Emission Analysis Results and Conformity Test**  
(Summer Weekday)

Pollutant	2018 BUDGET (tons/day)	2025 (tons/day)	2035 (tons/day)	2045 (tons/day)
VOC	7.5	2.8	2.0	1.7
NO <sub>x</sub>	14.9	6.4	4.1	4.5
Conformity Result		Pass	Pass	Pass

### Conformity Determination

#### Financial Constraint

The planning regulations, Sections 450.324(f)(11) and 450.326(j), require the TIP and LRTP to be financially constrained while the existing transportation system is being adequately operated and maintained. Only projects for which construction and operating funds are reasonably expected to be available are included. The RATS MPO, in conjunction with PennDOT, FHWA and FTA, has developed an estimate of the cost to maintain and operate existing roads, bridges and transit systems in Berks County and has compared the cost with the estimated revenues and maintenance needs of the new roads over the same period. The TIP and LRTP has been determined to be financially constrained.

#### Public Participation

The TIP and LRTP has addressed the public participation requirements as well as the comment and response requirements according to the procedures established in compliance with 23 CFR Part 450, RATS Public Participation Plan, and Pennsylvania's Conformity SIP. The documents were made available for a 30-day public review and comment period.

#### Conformity Statement

The conformity rule requires that the TIP and LRTP conform to the applicable SIP(s) and be adopted by the MPO/RPO before any federal agency may approve, accept, or fund projects. Conformity is determined by applying criteria outlined in the transportation conformity regulations to the analysis.

The RATS MPO TIP and LRTP are found to conform to the applicable air quality SIP(s) or EPA conformity requirements. This finding of conformity positively reflects on the efforts of the RATS MPO and its partners in meeting the regional air quality goals, while maintaining and building an effective transportation system.

**AIR QUALITY RESOLUTION FOR THE READING MPO**

Conformity of the FFY 2025–2028 Transportation Improvement Program (TIP) and 2045 Long Range Transportation Plan in Accordance with the Clean Air Act Amendments of 1990.

**WHEREAS** the Congress of the United States enacted the Clean Air Act Amendments of 1990 which was signed into law and became effective on November 15, 1990, hereafter referred to as "the CAAA"; and,

**WHEREAS** the United States Environmental Protection Agency (EPA), under the authority of the CAAA, has defined the geographic boundaries for areas that have been found to be in non-attainment with the National Ambient Air Quality Standards (NAAQS) for ozone and particulate matter; and,

**WHEREAS** the Reading Metropolitan Planning Organization area was designated under the 2008 eight-hour ozone standard as a marginal non-attainment area by EPA with an effective date of July 20, 2012; and,

**WHEREAS** effective April 5, 2005, the Reading Metropolitan Planning Organization area has been designated under the 1997 Fine Particulate Matter (PM<sub>2.5</sub>) annual standard as a non-attainment area by EPA; and,

**WHEREAS** effective December 22, 2014, the Reading Metropolitan Planning Organization area was redesignated as an attainment area under the 1997 annual PM<sub>2.5</sub> NAAQS with an approved Maintenance State Implementation Plan that includes motor vehicle emission budgets; and,

**WHEREAS** effective October 24, 2016, the EPA finalized the option that revokes the 1997 primary annual PM<sub>2.5</sub> NAAQS in areas that have been designated attainment or maintenance of that NAAQS removing the transportation conformity requirements for this NAAQS; and,

**WHEREAS** the transportation plans and programs are required to conform to the purposes of the State Implementation Plan and Sections 174 and 176 (c and d) of the CAAA (42 U.S.C. 7504, 7506 (c and d)); and,

**WHEREAS** the EPA issued the Final Rule on Transportation Conformity on November 24, 1993 for transportation plans and programs and projects; and,

**WHEREAS** the EPA amended the Final Conformity Rule various times between 1996 and present; and,

**WHEREAS** the Reading Area Transportation Study, the Metropolitan Planning Organization for Berks County, Pennsylvania, is responsible for the development of transportation plans and programs in accordance with Section 134 of Title 23, which requires coordination and public participation with the State DOT; and,

**WHEREAS** the final conformity rule (and subsequent amendments) requires that the Reading Area Transportation Study Coordinating Committee determine that the transportation plans and programs conform to the CAAA requirements by meeting the criteria described in the final guidelines.

**NOW, THEREFORE BE IT RESOLVED THAT** the Reading Area Transportation Study Coordinating Committee has found that the FFY 2025-2028 Transportation Improvement Program (TIP) and the 2045 Long Range Transportation Plan (LRTP) contribute to the achievement and maintenance of the ambient air quality standards; and,

**NOW, THEREFORE BE IT FURTHER RESOLVED THAT** the Reading Area Transportation Study Coordinating Committee finds that the FFY 2025-2028 Transportation Improvement Program (TIP) and 2045 Long Range Transportation Plan are consistent with the Final Conformity Rule issued on November 24, 1993, and subsequent amendments.

I hereby certify that this Resolution was adopted by the Reading Area Transportation Study Coordinating Committee on **May 16, 2024**.
